# chaos on claymodo

Hidden deep in the oceans on the world of Claydonia lies the tiny isle of Claymodo, a lush, jungle-covered spot that has never been plotted on any map. It is here that the evil Dr. Kiln has set up his secret base, adding the finishing touches to his plan of world domination.

Meanwhile, our heroes were gently flying via jet plane to the Clayhamas, a vacation paradise that all have been looking forward to greatly. The recently-turned-good Bad Mister Frosty®, world-famous chef Kung Pow, master claymorphosist Blob, freedom-fighter Lady Liberty, and Taffy "The Candyman" were all enjoying their roasted peanuts and complimentary half can of soda, when, out of the clear blue sky, a huge purple meteor came screaming toward our ill-fated bunch and knocked their jet out of the air, causing them to crash onto the small island of Claymodo. Upon discovering Dr. Kiln's intentions, they immediately went on the crusade to stop the madman.

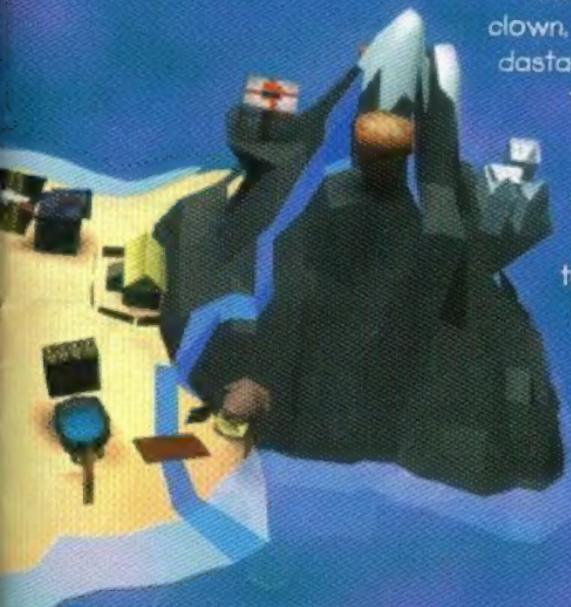

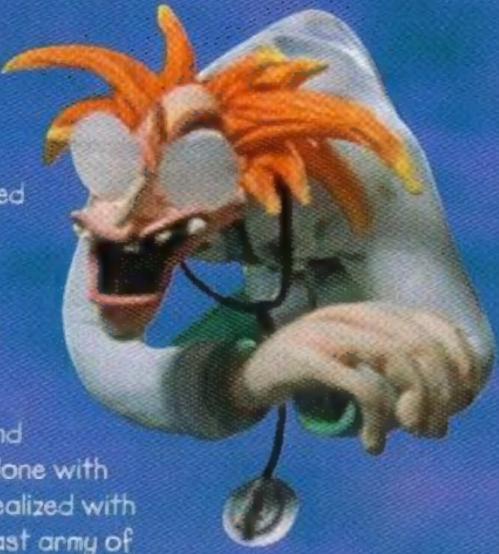

As the brave bunch formulated a strategy to foil the evildoers, Hougan, Dr. Kiln's evil scientist, was working on his secret "world-domination formula," when "Big Bessie," the huge meteor that nearly barbecued our valiant warriors, imbedded itself in the volcano that doubled as Hougan's secret lab with a thunderous crash. Unfortunately for Dr. Kiln, some of the radioactive goop

that splashed off of the enormous meteorite fell on Dr. Kiln's hand, and it immediately started to grow larger and larger. Dr. Kiln realized with horror that his hand had taken on a life of its own. He had but one choice: sever the hand that was mutating into a new life form.

Although Dr. Kiln's hand removal surgery (which was done with a chainsaw) was painful, he realized with glee that he could create a vast army of warriors with which to take over the world!

Dr. Kiln's maniacal plans were to be cut short, however—the hand, now known as High Five, was tired of always bending to Dr. Kiln's will and decided to join in the fight against him. Dr. Kiln was not so easily foiled, however. With the meteorite mutagen, he created his henchmen—Lockjaw, his loyal and sinister pooch, and Ickybod Clay, a yet-unknown type of clay specter.

When Bonker, the mischievous clown, caught wind of Dr. Kiln's dastardly plan, he immediately joined the evil Dr. Kiln's cause, wanting nothing more than to cause havoc on the world of Claydonia. The Zappa Yow Yow Boyz, the only natives to Claymodo, want nothing more than to get all of these crazy idiots off of their island. Who will win this glorious battle of good vs. evil? Only you can decide the outcome!

# CONTROL STICK FUNCTION

The Nintendo 64 Controller contains a Control Stick which uses an analog system to read the angles and direction of its movement. This allows subtle control that is not possible using the conventional + Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press START while holding the L and R Buttons.

The Control Stick is a precision instrument, make sure not to spill liquids or place any foreign objects into it.

## Beginning the Game

First, you will need to insert the CLAY FIGHTER™ SCULPTOR'S CUT™ Game Pak into your Nintendo 64 Entertainment System.

Now move the Power Switch to the ON position and away you go!

**Note:** These controls are for a Clay Fighter that is on the left side of the screen, facing the right. Flip all the above controls for Clay Fighters that appear on the right side of the screen and face left.

### Jump:

The clay fighter will jump straight up into the air. Some clay fighters are able to jump higher than others.

### Backward Jump:

Your clay fighter will jump into the air away from his opponent.

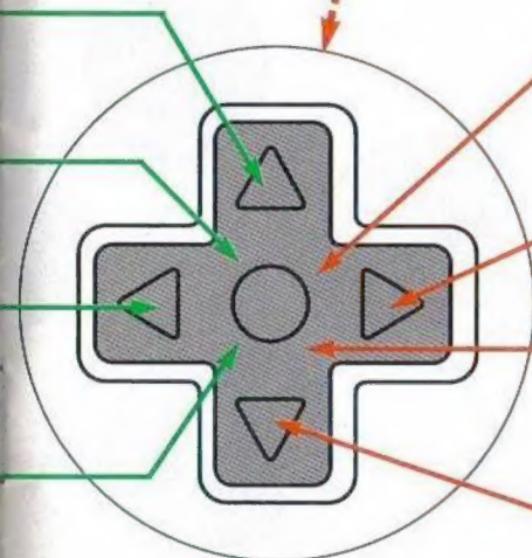

### Away:

This will allow your clay fighter to defend against attacks coming in from above, or from chest height.

### Crouch Defense:

Your clay fighter will defend against low attacks and most chest high attacks.

# controlling your clay fighter

## **Forward Jump:**

Your clay fighter will jump forward, towards the other player and possibly over them. Many actions can be performed while your clay fighter is in the air.

## **Towards:**

This will allow your clay fighter to walk forward or perform an attack, which requires forward motion.

## **Offensive Crouch:**

Your character will crouch down ready to attack the opponent. Watch out! You character will not block in this position.

## **Crouch:**

Your character will move closer to the ground allowing low attacks.

## Punches and Kicks

"BASIC TRAINING – WHAT A PIECE OF CLAY"

There are 3 basic punches and 3 basic kicks available to all characters:

### Brutal Punch

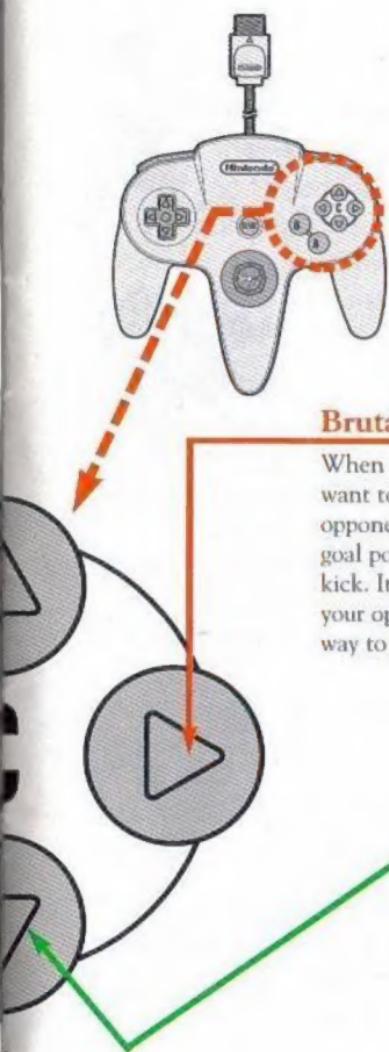

A no holds barred punch will brutalize your opponent, but only if you can land it in time.

### Fair Punch

This plain wrap punch is one that any John Dough could throw. It has an average speed and an average strength.

### Wobbly Punch

This wimpy attack does not do much damage. However, you can get a lot of these punches in before another clay fighter can land a more powerful punch.

### **Brutal Kick**

When you really want to send your opponent through the goal posts, try this kick. It should send your opponent half way to Jupiter.

### **Fair Kick**

An attack which lends much of its character to John Dough. It is not the strongest kick, nor the weakest. In addition, it will get to your opponent in an average amount of time.

### **Wobbly Kick**

Sometimes you will need this puny kick to get another clay fighter off of your back. You will usually land one of these kicks before a stronger attack can get to you.

## Close Attacks:

These attacks can be performed when your clay fighter is next to his or her opponent. Your clay fighter's normal punches and kicks may also be different when he or she moves into close combat.

## Throws:

Some clay fighters have the capability to grab an opponent and throw them across the arena.

Although a clay fighter can survive a fall like this, he or she must use some of their energy to pull themselves back together. If you want to throw another clay fighter, you will need to get close to the fighter and then grab them. You can do this by pressing forward or away when close and pressing medium or heavy punch (or kick, depending on the clay fighter). The type and nature of the attack varies with each clay fighter, so you will have to experiment a bit to master these attacks.

## Special Moves:

While the clay fighters have learned a collection of basic throws, holds, punches, and kicks, each character has studied a variety of special moves. These moves are unique to each character. They will give your clay fighter a much-needed edge when your opponent's clay is down. You can also surprise another clay fighter with a move that they might not be expecting. Timing is very important in any of the special moves, and it might take you a while to perfect these and other attacks.

## Super Special Moves:

If you are not satisfied with the mayhem of special moves, you can use these super maneuvers to completely devastate your opponent. These can only be performed if your super meter is filled to at least level one.

## Parrying:

All the clay fighters can parry any attack that is heading in their direction but timing is crucial. You must tap toward just before impact. You can also parry low by tapping down just before impact. If successful, the attacker will be stunned for a split second to allow you to land an attack. If you fail, prepare to feel the pain.

## Claytalities:

This is the "ultimate" way of finishing off your opponent. It can only be performed at certain situations. Try to figure out when!

## So You Wanna be a clay fighter. Huh?

Here are a few hints at playing Clay Fighter™ Sculptor's Cut™:

1. When all else fails, remember to block. Wait for your opponent to slip, and pound him into oblivion.
2. Experiment with different control pad and button combinations. You never know when you might find a new move, or...
3. It is possible to block special moves. However, each time you do so your life energy decreases. It's best to avoid this situation whenever possible.
4. Blocking low will not always protect you from certain attacks. Study the clay fighters carefully. Some moves may appear to hit low, when they actually hit high.
5. Be adventurous when fighting. You may stumble upon secret areas.

## The Clay Fighters

# high five

Once Dr. Kiln's "right-hand man," High Five has become tired of following the mad dictator's crazed will. Becoming huge from the meteorite goop that was spilled on him while he was still attached to Dr. Kiln, he is now a formidable force on the side of good. Enemies scatter when High Five balls himself into a fist, as no one wants to feel the force of that wallop!

# lockjaw pooch

Once Dr. Kiln's pet bull terrier, Lockjaw was mutated by the meteorite goop into the monstrosity he is now. Completely loyal to his master, Lockjaw snarls, chomps, and growls his way through his opponents. While the good guys would probably like to see Lockjaw on a leash, Dr. Kiln routinely sends him out to do his most sinister deeds. This is one dog who is bad to the bone!
